TRANSFORM

**Surface transport** logistics companies run their business operate through different types of vehicles, trucks etc. As the competition becomes stiffer, each and every penny has to be looked after. It is a high wear and tear business and a business with many points of leakage. Management has to keep a hawk's eye on all such leakage point. It has to take care of preventive maintenance, fuel efficiency, spare parts management and other overheads too. While doing all this, it also needs to have an efficient sales management system to please the customer.

**ebizframe ERP is a software solution that addresses concerns of this industry. Value benefits derived by our clients are enormous.**

## Value-Benefits harnessed by clients in logistics business from ebizframe

- **Lower cycle time** for providing services without guess work with visibility of available trucks or those going to be free.
- **Reduction in pick up time** for collecting the material from customer site results in turn-around time of an order.
- **Highly satisfied customer** due to timely pick up and avoidance of duplicate invoicing.
- **Correct invoices** on time with complete integration between **Operations and Accounts**.
- **No double payment** to hired drivers as entry is real time.
- **No manipulation** - Integrated Operations and Accounting remove chances of changes, reducing the leakages.
- **Blocking leakages in revenue** - 100% accuracy about other recoverable charges for intra boarder movement with real time recording in ERP.
- **Accurate accounting** - Hiring of drivers and vehicle at very short notice is a common practice. If owner is found to be same during payment, though on-hire drivers and vehicle are different ebizframe; single payment against multiple deliveries is possible. ebizframe moves liability to the actual owner at the time of payment.
- **Trip wise profitability** is generated enabling the company to devise better freight plans.
- **Automatic transmission of information** about consignment delivery creates great comfort level between customer and transporter.
- **Management of Multiple Locations** is transparent and on-line - no confusion with tight control on editing of vouchers.
- **Separate tracking** of owned and hired vehicles provides better control on operational efficiencies. Also helps
- **Disciplined accounting** system presents "single version of truth".
- Add-on feature of cost center based budgeting and accounting allows better control on expenses, hence raise profitability.
- Add-on features of **Vehicle Maintenance** and **Fuel Consumption** helps the company to keep track on critical costs on vehicle.

It is very critical not to lose any customer, fresh enquiry or a walk-in customer.

Then it is equally important that you serve him with good quotation, timely pick-up and delivery services, tracking of a consignment till it reaches customer etc.

The automation should also take the pain of managing rates for different routes, customer based rates etc.
